medium duty buses and support vehicles

Summary:

The District was awarded roughly \$8.4M in capital grant funding for the purchase of medium and heavy-duty buses. As demonstrated in the subsequent funding outline, we have ordered 20 such buses at just over \$5.1M, leaving \$3.2M in available funding.

In a coordinated effort and some forward thinking, the District reviewed the remaining useful life of the entire fleet, how vehicles have historically been used (paratransit vs fixed route), and implementation of a contingency fleet, so to determine how best to support the public with the remaining funds available to us.

Through these efforts, we have determined that the remaining funds would be best used for 10 medium-duty buses and support vehicles. The medium-duty buses are more cost effective, fuel efficient, and can be used for fixed routes or paratransit; allowing them to pull double-duty if you will. Not only will these units provide a benefit while in service, upon reaching their useful life, these double-duty units will have an even greater impact as they enter the contingency fleet rotation.

To support these efforts, we would like to reallocate the \$1.8M in funding designated for heavy-duty buses to the smaller double-duty buses and support vehicles.

## AGENDA ITEM #3f – CONT.

These grants are 100% funded using COVID Relief Funds or Toll Revenue Credits in place of our local match.
